

AREEB UR REHMAN

Full-Stack Web & Automation Developer | Data & AI Engineer

+92 331 2298 823 • areebrehman615@gmail.com • Karachi, Pakistan • [linkedin.com/in/areeb-ur-rehman-81b057292](https://www.linkedin.com/in/areeb-ur-rehman-81b057292)

PROFESSIONAL SUMMARY

Full-Stack Web & Automation Developer and Data & AI Engineer, final-year Computer Science student at FAST-NUCES. Adaptive engineer with a strong focus on building scalable full-stack applications, web-scraping/automation solutions, data pipelines, custom AI agents, and efficient backends. Proven track record across full-time engineering (Sliding Scale Technologies), startup environments (Trimline Tech Ventures), and freelancing (Upwork/Fiverr). Expert in full-stack development, web automation, and RAG-based AI systems, balancing high-speed AI-assisted development with rigorous, manual logic-building to ensure code quality and efficiency.

EXPERIENCE

Junior Software Engineer

Sliding Scale Technologies | Apr 2026 – Present

- **End-to-End Development:** Designed and built scalable applications and MVPs from concept through production, owning the full development lifecycle.
- **Internal Tooling:** Developed and maintained internal tools to support and streamline engineering workflows.
- **Production Delivery:** Delivered production-ready, scalable solutions in a hybrid, full-time engineering role.
- **Tech Stack:** JavaScript (MERN), Python, LangChain, LangGraph

Junior Backend & AI Engineer

Trimline Tech Ventures | Nov 2025 – Present

- **Sawda GPT:** Developed the backend infrastructure for an AI-driven trade analyst, including custom API development and database management.
- **Data Pipelines:** Engineered robust data pipelines to feed the Sawda GPT bot, ensuring real-time data availability and accuracy.
- **PowerPresent AI:** Scaled a senior-led project by designing cost-effective database schemas and defining backend structures to optimize performance and reduce latency.
- **Tech Stack:** Python, FastAPI, PostgreSQL, LangChain, LangGraph, Docker, Requests

Freelance Data Engineer

Upwork & Fiverr | Jun 2025 – Present

- **Web Scraping & Automation:** Built complex scrapers using Selenium, Playwright, Scrapy, and Requests, implementing advanced proxy rotation and session management to bypass IP bans and anti-bot measures.
- **Workflow Automation:** Integrated n8n/Python pipelines for low-code/high-logic automation sequences, connecting disparate data sources for international clients.
- **Consultation:** Translated vague client requirements into technical roadmaps, maintaining a high-rated profile through consistent delivery.

LEADERSHIP

Co-Head, CS Competitions

PROCOM '26 (FAST-NUCES) | 2025 – 2026

- Led the CS Competitions department, managing 9 specialized teams (approx. 50 members) for the largest flagship computing event at FAST, including delivery of a promotional mini-game.
- Oversaw resource allocation, technical problem-set vetting, and departmental coordination under tight deadlines, applying software development best practices across teams.
- Managed timelines, operations, and quality standards aligned with professional industry practices, collaborating closely with the Head and Co-Heads to deliver a successful, impactful event.

EDUCATION

BS in Computer Science

FAST-NUCES, Karachi | Aug 2023 – Present (Expected June 2027)

- **Current Standing:** Final Year | CGPA: 3.0+
- **Key Coursework:** Design & Analysis of Algorithms, Database Systems, Artificial Intelligence, Data Structures

GCE A-Levels & O-Levels

Generation's School | Graduated 2023

SKILLS

Languages: Python (Advanced), SQL (PostgreSQL), C++, JavaScript (MERN), HTML & CSS (Bootstrap)

AI & Data: RAG Systems, LangChain, LangGraph, Schema Design, Data Pipelines, Prompt Engineering

Web Scraping: Selenium, Playwright, Scrapy, Proxy Management

Tools: FastAPI, Docker, Git/GitHub, n8n, Cursor, GitHub Copilot

Core Strength: Algorithmic logic-building and efficient schema optimization
